

Polish additive R&D company debuts on stock exchange

Tremendous growth continues

At the end of 2021, the National Court Register registered the merger of MODE S.A. listed on the NewConnect Stock Exchange and Sygnis New Technologies sp. z o.o. Since then Sygnis - one of the longest-established companies in the Polish 3D printing market - is present on the Stock Exchange.

Sygnis S.A. is a deep-tech company specializing in research and development projects in the field of additive technologies. Sygnis S.A. is currently working on several dozen projects, solving problems in the areas of new additive manufacturing, biotechnology, energy production and transportation, and nanotechnology.

“Our interdisciplinary activities focus on innovative R&D projects in the areas of biotechnology and nanotechnology. Some of them are at a very advanced stage of development. We want to show investors the project’s potential, therefore in the coming weeks we will publish development plans for the next few years” – said Andrzej Burgs, CEO of Sygnis S.A.

Sygnis S.A. consists of 3 main segments: New Technologies, Bio Technologies and Nano Technologies. “New Technologies” brand is the longest operating brand of the Sygnis Group. The R&D team deals with the development of proprietary machines operating in the field of additive technologies, whereas the other team of experienced 3D printing specialists performs rapid prototyping services, creates advanced projects and conducts tests of entirely new materials for 3D printing.

The “Bio Technologies” brand specializes in providing scientific equipment to the Polish market, with particular focus on high-resolution live cell imaging and tissue engineering. Their portfolio combines various techniques, e.g.: 3D bioprinting, biopatterning, 3D holotomographic imaging. “Nano Technologies” is the youngest segment in the Sygnis Group. It helps to provide modern additive and analytical techniques in the areas of micro- and nanotechnology.

After the merger of companies the MODE360 ° brand doesn’t cease its activities. It is currently being incorporated into the structure of Sygnis S.A. while continuing its mission and being the fourth segment of Sygnis S.A. The area of this brand’s operation is to create original devices and systems for automatic product photography and 360° product presentation, especially for e-commerce sector.
