

## EVENT OFFER

Awards | Workshops | 3D scanning | Personalized gadgets

## A team **of specialists**

We are a leader in additive technologies in Poland. We conduct trainings, we create prototypes, test them and develop short production series on request.

We use 3D printing as one of the technologies that helps us bring your idea to life.

# What do we offer?

CORPORATE  
EVENTS

EVENTS  
FOR  
CHILDREN

OVERPRINTS

AWARDS  
AND  
STATUETTES

GADGETS  
AND  
ACCESSORIES

## Corporate events

**We comprehensively arrange corporate events.**

**We support the creative department in your enterprise, proposing innovative solutions with the use of new technologies.**

We offer a wide range of services, from 3D scanning, through workshops using 3D printers, printing gadgets to large, specific projects tailored to the Client's needs. We take into account the nature and profile of the event, as well as place logotypes of Partners and Sponsors on demand.

## Corporate events

In 2018, we have organized a 3D printing show for My Place company on the occasion of the opening of the new shopping mall - New Station.

We have created and printed dedicated 3D models referring to the nature of the event, conducted a full 3D printing show and supplemented the cooperation with online promotion of the event.

**MYPLACE**

Events for children

## Education in the spirit of STEAM

**We have extensive experience in organizing events for children and teenagers.**

In addition to 3D printers and scanners, we also use 3D pens during the course of thematic workshops and games. We adjust the level of workshops sophistication to the age of participants to provide a balanced dose of knowledge and fun every time.

During the classes, we emphasize the development of spatial imagination, creativity, manual dexterity and electronic device operation skills on basic and advanced levels.

## Events for children - **Museum world in 3D** **Museum of the History of Polish Jews**

In 2019, we organized a series of Saturday themed workshops that brought closer the elements of the museum permanent exhibition in an accessible form, with the use of new technologies. We combined interactive presentations with games involving both body and mind, during which participants created individual souvenirs and worked in groups on a common solution to the problem.

**POLIN**

**Museum of  
the History  
of Polish  
Jews**

Overprints **IMAGO**

## 2D printing on various flat surfaces

**We are able to digitally print any patterns on food products, using food dyes / food colourings.**

The Imago Printer Falco comes in three configurations. It allows printing on virtually any type of flat surface.

## Overprints - IMAGO in „Technika by Sygnis”

You can see print on food in our showroom Technika 3d-printed by Sygnis on al. Solidarności 78 in Warsaw.

We print eco-printers prints and print T-shirts at the company's headquarters.

## Awards and statuettes

**We create awards and statuettes for plebiscites and industry competitions.**

Thanks to the use of 3D printing technology, we are able to develop tailored individual short-series projects, as well as molds for mass production. Each time, our design department, in close cooperation with the client, creates a sketch of the idea, which after refinement and acceptance goes into production.

## Awards and statuettes

**rochstar**

**At the request of the production company Rochstar, we have designed, made and delivered statuettes for the winners of the popular TV series - The Voice of Poland.**

Our proposal turned out to be interesting not only in terms of high quality workmanship, but also because of its competitive price and short delivery time. For this reason, Rochstar decided to cooperate with us also the following year, in the next edition of the TV series.

## Gadgets and accessories

**We create personalized gadgets and branded office and event accessories for our own and our clients' needs.**

**Figurines, key rings, bookmarks, pens, boxes, straws, diplomas and many more.**

We are also able to prepare the above proposals for the needs of internal company events, meetings with clients, CSR / PR activities, as well as for conferences pressbags.

## Gadgets **and accessories**

In 2019, we designed 3D printed pens with a place for a logo. The design can be freely modified and adapted to the special customer order.

## Gadgets and accessories - **occasional pens and packaging**

For our clients, we have implemented several hundred different designs of personalized gadgets and accessories prepared for specific events. Each of the products goes through a conceptual phase, during which we learn about the Client's needs, propose solutions and together we choose the optimal version of the initial idea.

**keys - pens**

**books - boxes for chocolates**

## Gadgets and accessories - **for the HoReCa sector**

We are currently the only ones on the global market to produce fully biodegradable 3D printed reusable straws. Thanks to the use of additive technologies, we can completely adapt the project to your needs. We are able to personalize individual pieces for a specific user, place a logotype and play with the 3D model's geometry at will to achieve extraordinary and unique effects.

# Gadgets and accessories - **for the HoReCa sector**

## Gadgets and accessories - **three-dimensional diplomas**

We create certificates on demand using e.g. 3D printing. We also use other manufacturing technologies.

Depending on the purpose and expected final effect, we will help you choose the right technique and materials from trusted suppliers.

## Gadgets and accessories - **busts**

We scan both objects and living people in 3D. We digitize not only museum collections, but also celebrities... For one of the Aktivist Magazine events, we scanned the head of Polish celebrity Julia Wieniawa and prepared her bust in a 1:1 scale. This is just one of many possibilities offered by transferring real objects to the digital environment.
